Rationale	The main aim of this syllabus is to provide an opportunity for the learners to use English for different situations. Every chapter of the syllabus is based on reading text and a range of tasks and activities, designed to enable the learners to practice the different skills, sometimes individually and sometimes in pairs or groups. This syllabus is allowing grammar to be used in a more meaningful role in learning language. Thus, the students develop their language skills by practicing language activities and not merely knowing the rules of the language.
Learning Outcomes	<p>After the completion of the course, learners will be able to:</p> <ul style="list-style-type: none"> • Develop Reading, Writing, Listening & Speaking Skills • Develop creative writing • Acquire grammatical accuracy • Communicate effectively
